INTRODUCTION

Tyrion is poised to revolutionize the crypto industry by providing volatility-safe, Regenerative finance (REFI) focused, utility driven services and products that help users build better, more secure portfolios that are protected from market fluctuations. We seek to make cryptocurrency a viable option for mainstream adoption by eliminating the need for users to understand complicated technical concepts or have tech-savvy skills.

With a vibrant community of empowered individuals and with our community-driven mindset, we are committed to bringing the potential of blockchain and cryptocurrency to the masses and paving the way for a new era in digital finance. The safe-haven catalyst that we strive to be is a critical part of our mission – it is essential for us to provide ways to safeguard consumer's digital assets from market uncertainties, crashes, rugpulls and never ending winters.

OUR CULTURE

VISION

To be the catalyst for users to be able to build stabilized, secured & diverse digital assets portfolio

MISSION

Launch products that people will love to use and to do it in a way that is sustainable, easy to maneuver.

VALUES

Community-driven, Decentralization as a service, Re-Fi focused, Transparency & Compassion

PROBLEM

As cryptocurrency looms larger in the public consciousness, volatility is a significant obstacle to its widespread adoption. A downturn in the market can wipe out an entire position in the blink of an eye. It happens too often to be ignored—the risks of investing in cryptocurrency are real, and they can result in heartbreaking losses. The general consensus is that if someone wants to invest in crypto, they should be prepared to lose everything.

Cryptocurrencies can be subject to bouts of high volatility due to their unique traits. These include limited liquidity and thin trading volume, which amplifies the effects of market sentiment on prices. GARCH research has provided valuable insight (by using a combination of historical observations) that can help understand the gravity of cryptocurrency volatility problem. Bottom-line : Volatility is the elephant in the room that no one can disagree with..!

OPPORTUNITY

Investment protection is a common topic in the traditional financial markets. 401k plans, for example, protect 401k participants from market risk and help them preserve their assets for the future.

IUL (indexed universal life) in the USA, is an alternative asset class that protects principal against market downturns and enjoys substantial, tax-free growth in positive market years while the 0% floor effectively eliminates the risk of losses during market downturns, and further provides tax-free income and death benefit.

What if there is a vehicle in digital asset class that provides similar capital protection for the tokens that users hold? it may sound like too good to be true?, but Tyrion is planning to implement a product that does exactly that..

SOLUTION

The Tyrion Shield program works as if it creates an insurance policy on the base asset. This enables consumers to have peace of mind that their investments will remain protected regardless of market conditions. Investors don't need to worry about losing money over time – they can rest assured that their base assets are insulated from changes in market value. It is designed to provide investors with assurance and a reliable return on their investments, making it an ideal choice for those looking to protect their hard-earned money and users can invest with confidence knowing their assets will be SAFU no matter what the future holds.

For instance if someone buys TYON tokens for 2 BNBs, they can rest assured that when it comes time to claim their base asset (BNB) back, the Tyrion Shield program will return everything exactly as it was originally invested. This ensures that investors can freely allocate their funds without the worry of ever losing their capital. Tyrion Shield gives investors the peace of mind they need to confidently invest in Tyrion Ecosystem or in other participating digital assets (BNB, ETH, BTC & so on) for that matter.

PROBLEM

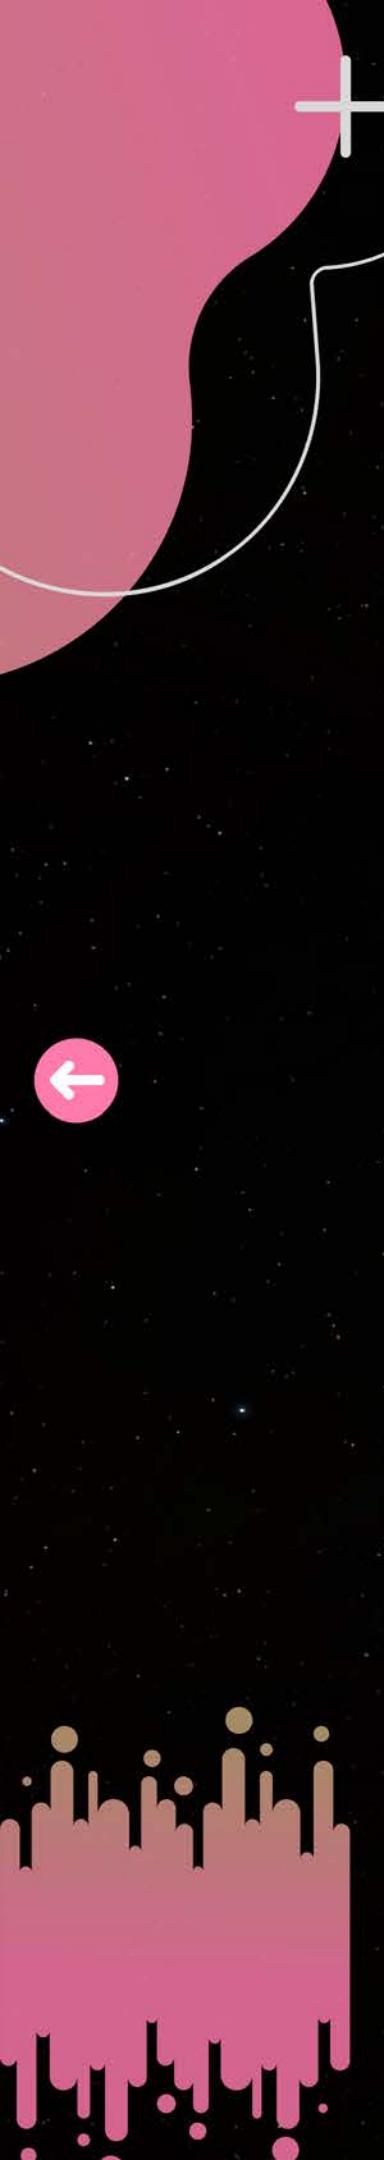

When it comes to crypto assets, utility is a major issue that cannot be overlooked. Utility means the ability of an asset to be used for practical tasks such as buying goods and services. Without utility, a crypto asset is only worth its speculative value. This makes it difficult for investors to make long-term gains from their investment and also reduces the likelihood of widespread adoption.

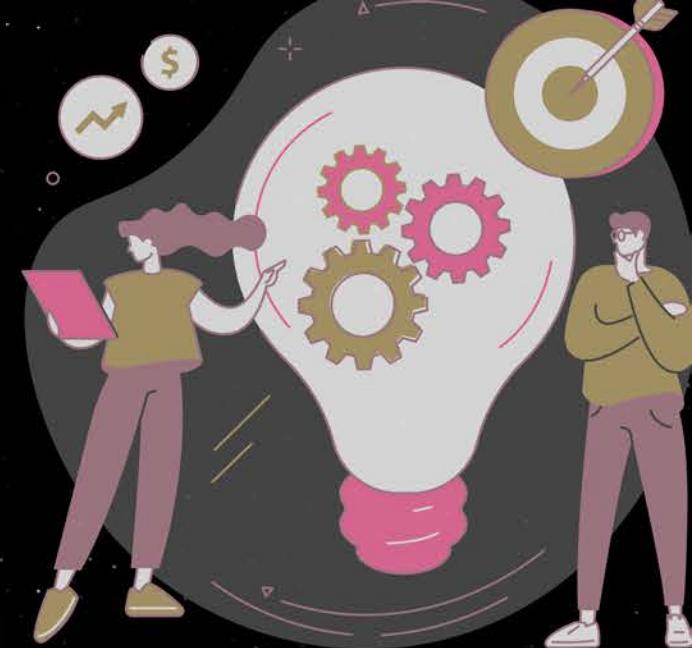

In summary, utility is a critical factor when it comes to crypto assets as it determines whether or not an asset is viable and successful. A cryptocurrency project that does not have the capability to deliver value in some shape or form, provide meaningful solutions to real-world problems or offer users any tangible benefits will likely fail in the long run.

OPPORTUNITY

UTILITY is the King. While most projects are focusing on finance, trading, increasing liquidity and new ways to earn passive income via DeFi which are important aspects of crypto currency use cases, however there is still much more that can be done to unlock the true potential of digital assets, we still have a long way to go before achieving widespread adoption.

With more and more innovative ideas and solutions being explored, it's clear that we are still far away from fully unlocking the possibilities of this technology. Cryptocurrencies have an undeniable ability to revolutionize how businesses operate and how people interact with their finances. The possibilities are endless when it comes to unlocking the full potential of cryptocurrencies and exploring different use cases for them around the world.

TYRION

SOLUTION

Tyrion is committed to making decentralization a reality by providing innovative solutions that solve real-world problems. Our products are going to be designed to deliver services that are secure, scalable, accessible and build trust through service excellence and consumer-centric. Via Decentralization as a Service (DaaS) approach, Tyrion is driven by a mission to decentralize critical use cases as well as explore innovative ways to tokenize them.

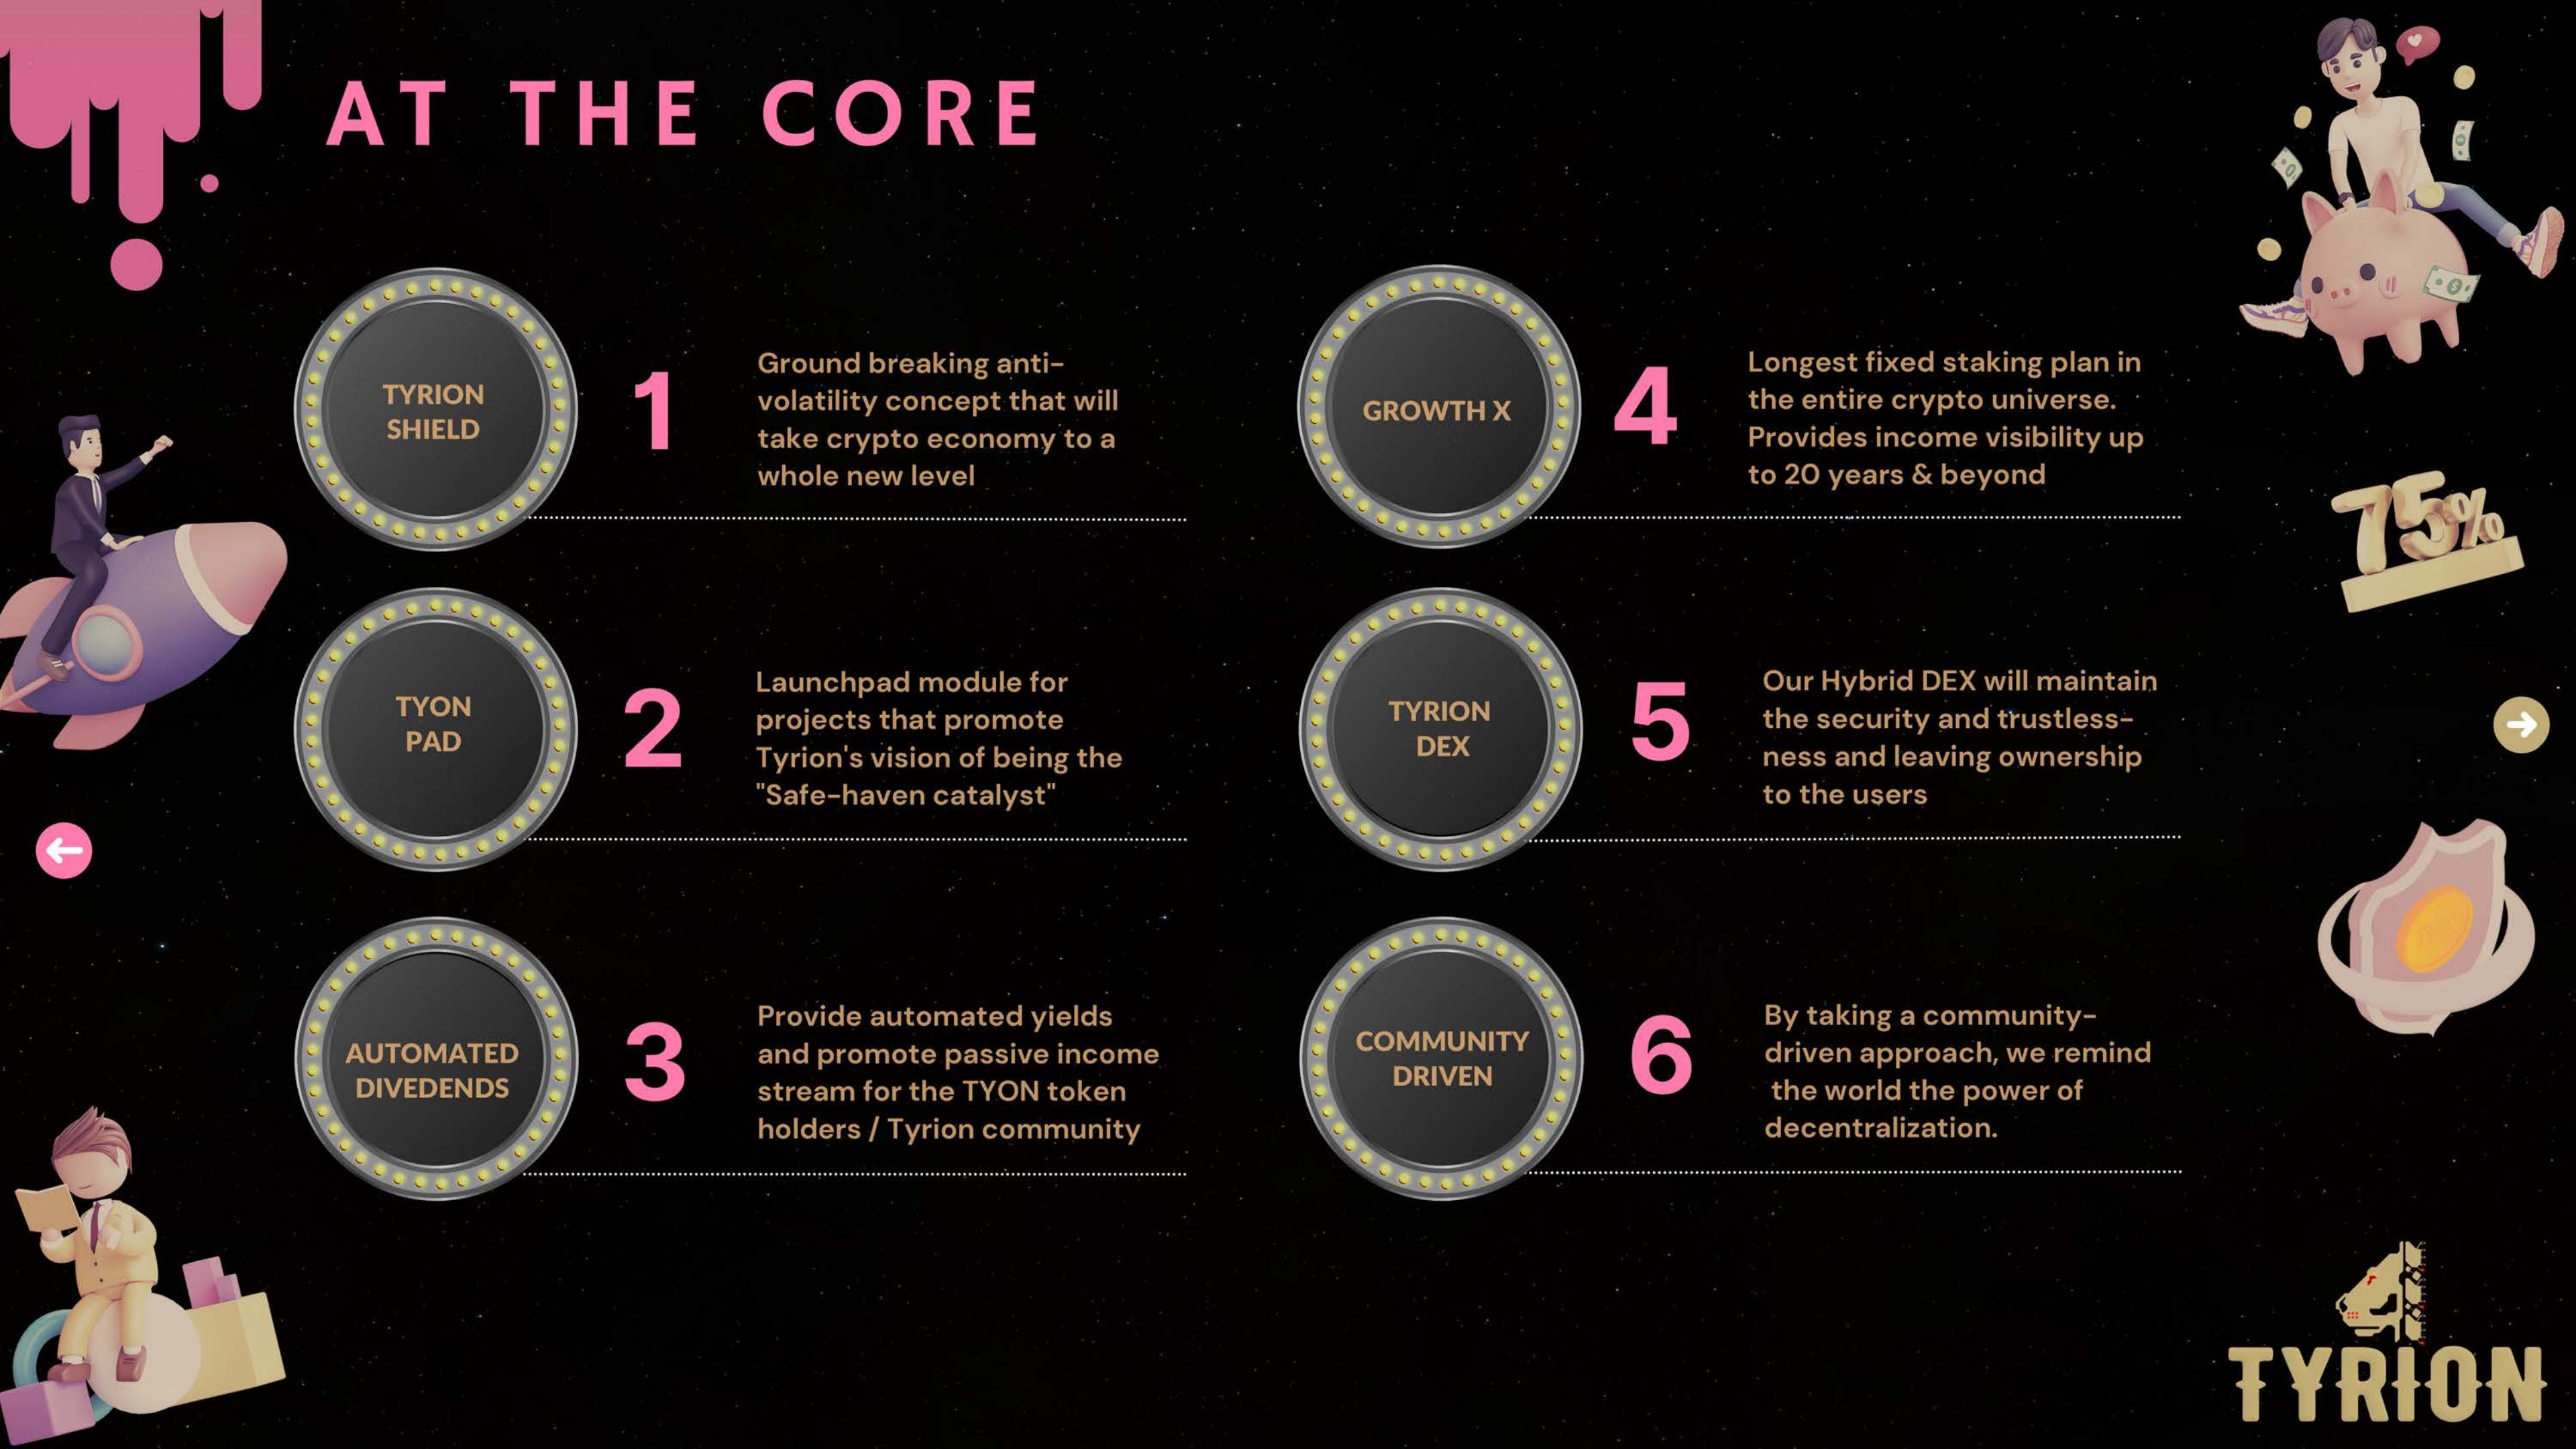

From gaming to ecommerce, outsourcing to outreach activities – Tyrion will be aiming at creating a portfolio of offerings that provide our users with the best possible services and solutions based on ReFi and DeFi concepts. We are proud to be an active member of the ever-evolving digital economy and are eager to continue creating products that bring utility to those who need the most.

TYRION

AT THE CORE

TYRION

PRODUCTS

DECENTRAL E-COMMERCE

Bringing E-commerce to the decentralized arena and remove centralized market monopolies

TYRION TECH

Technology outsourcing that connects freelancers, service providers to businesses in need

TYRION ACADEMY

Knowledge outsourcing that connects trainers, established academies to learners, companies

MONEY MARKETS

Connects borrowers & lenders and provides competitive interest rates & APYs

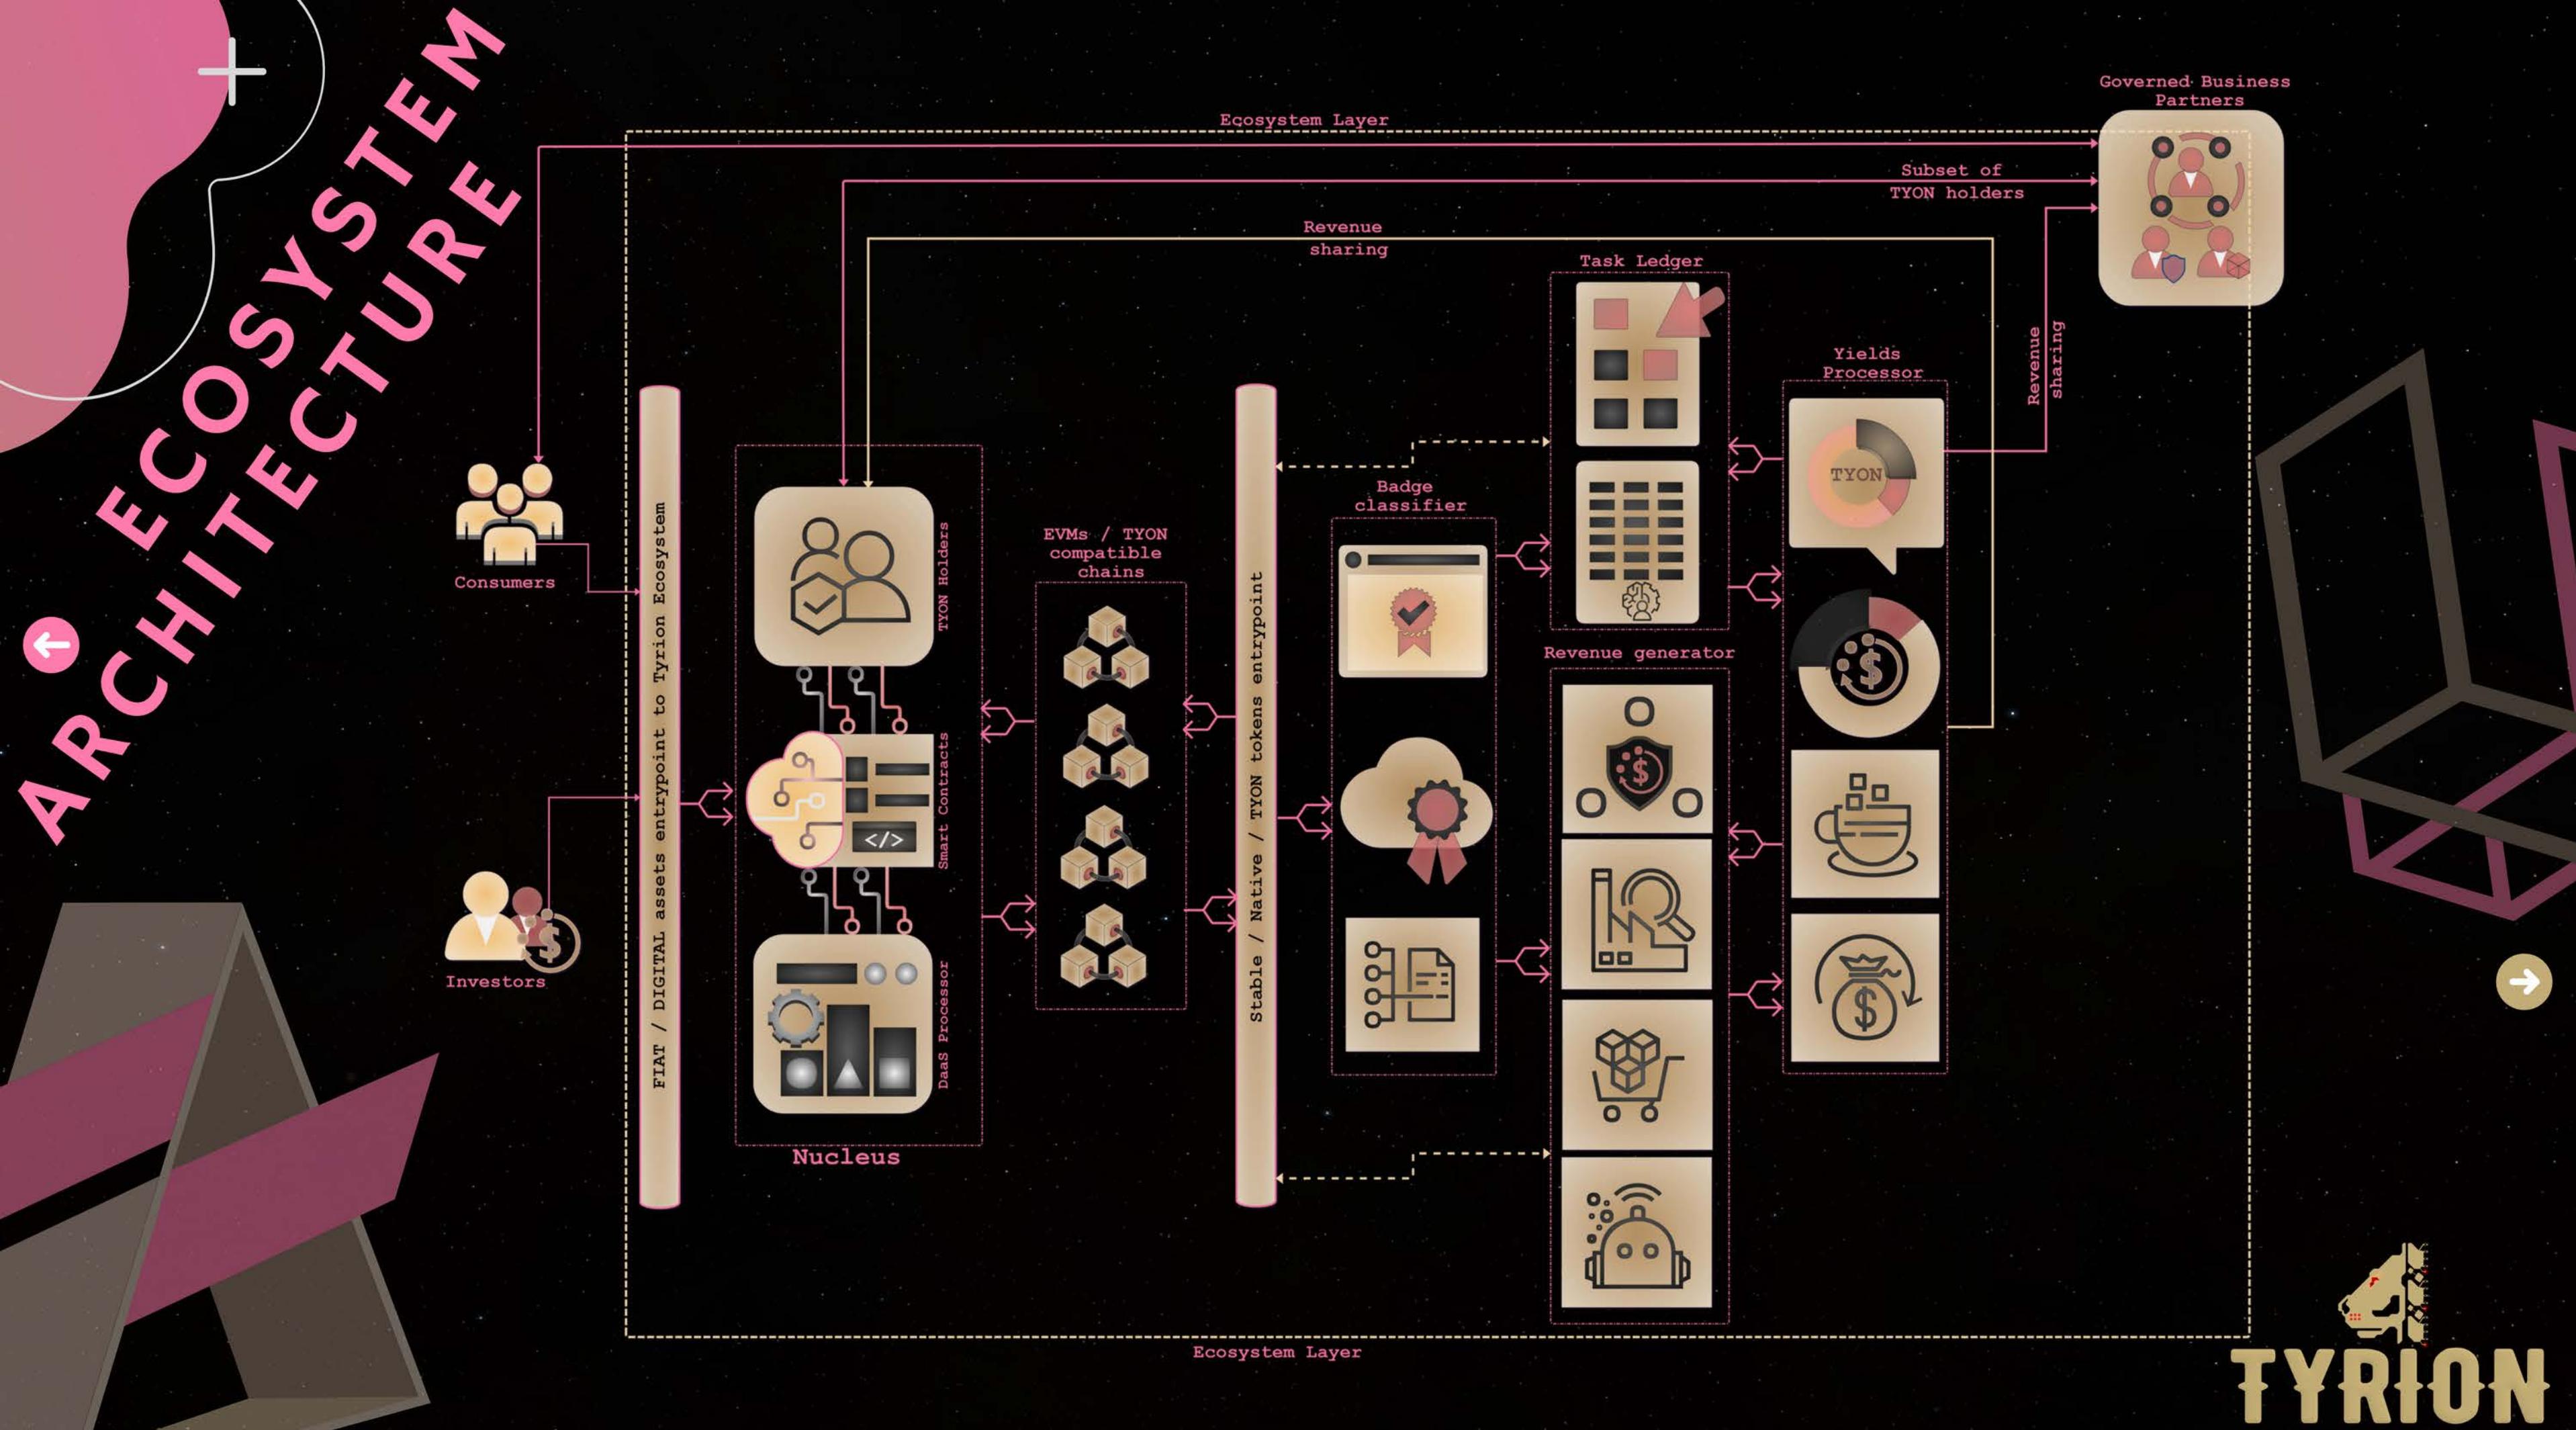

TYON'S FUNDME

Ecosystem's outreach module to promote & help people who is going through hardships

TYRION VERSE

Segregation of products relating to NFTs, P2E, GameFi & P2P – with fair & transparent play fields

10% RELEASED AT TGE ; EVERY 90 DAYS, 30% LINEAR RELEASE

NOTE

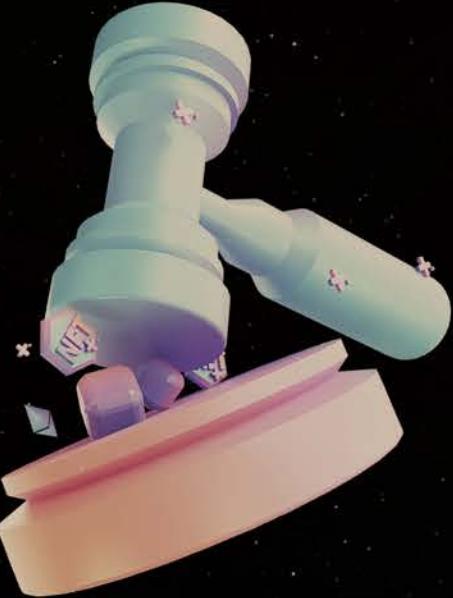

This can change until executed via smart-contract prior to public sale

TYRION

BAD GENOMICS

-INTRO-

The TYON badges are extremely rare and sought-after assets that can only be obtained during the initial pre & public sales events. As these badges are intangible assets, they will remain intact with holders throughout the life of the project. These badges not only provide recognition for those who hold them at wallet level, but also grant holders exclusive access to special events and other benefits. It is a symbol of being part of something greater than one's self, of being part of the movement to bring cryptocurrencies mainstream.

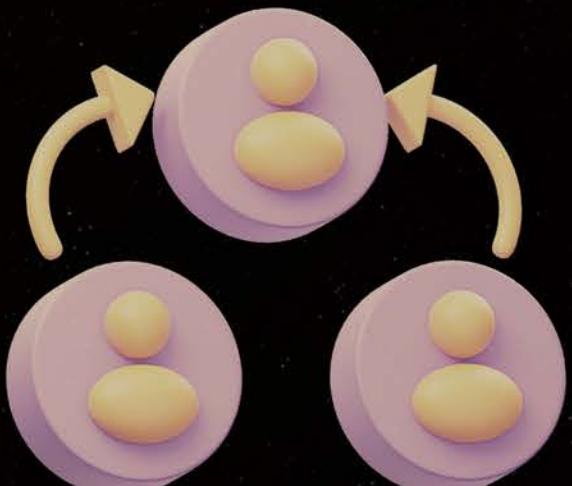

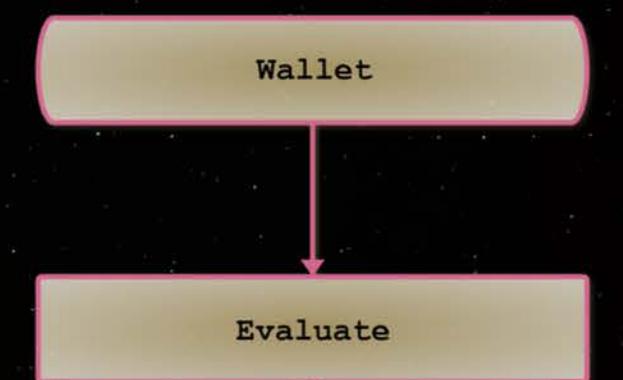

As such, holders of top-tier badges have access to exclusive rights that are not available to lower tier members. These rights include higher level governance over the ecosystem and the ability to carry out certain exclusive community work. Badges cannot be transferred or given away.

In order to maintain the badge statuses, it is important to have a clear understanding of the tier assignment process & how to maintain badge status in order to ensure that maximum benefits are obtained.

ROADMAP

September 2021

Ideation

TYON was created to achieve :
Regenerative Finance & DaaS
(Decentralization as a Service) and to
curb volatility in tokenized investments.

Q2 & Q3 - 2023

The Launch

Finalize Pre-SEED, SEED, Strategy ,
Token Vesting & Public Sales,
Audit completion, Token
Distribution, get listed with
trackers

February 2021

Initiation

Thinktank formed, project name,
concepts, approach finalized &
development efforts kickstarted

2024 – H1

Meereen

Tyron's flagship program
"TyronShield" launch, NFTs,
TVVerse, TYON's FundMe workforce
setup & Testnet release

2025 – H1

Yunkai

Production Launch of ReFi &
Launchpad initiatives. Retrospect.
Community governance & DAO
initiation. Research initiation for
other DLT technologies

2024 – H2

Qarth

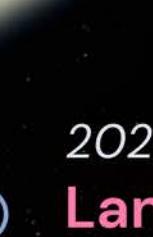

First-ever Tyron's DaaS product
Launch via "TYONs FundMe".
Mobile app release, MVP
Technology & Knowledge
outsourcing, TVVerse products

2023 – H2

Lannisport

TYONpad, CDEX,
Borrowing/Lending, Staking,
Growth X services launch,
Disclose TyronShield's prototype
and Testnet release

To the future as follows

2025 – H2 & Beyond

Vaes Dothrak – 2025 – H2
Casterly Rock – 2026 – H1
Skahazadhan – 2026 – H2
The idirolat – 2027 – H1
King's Landing – 2027 – H2 and Beyond
